## ENERGY *Savings*

SAVING ENERGY EQUALS SAVING MONEY. WITH HEATING AND COOLING TYPICALLY BEING THE BIGGEST ENERGY EXPENSE IN A HOME, GREYSTONE RECOMMENDS SETTING YOUR THERMOSTAT ON 68 DEGREES IN THE WINTER. YOU CAN CHECK OUT THE GREYSTONE MARKETPLACE FOR NUMEROUS RESOURCES AND REBATES. VISIT [GREYSTONEPOWERMARKETPLACE.COM](http://GREYSTONEPOWERMARKETPLACE.COM) FOR MORE DETAILS.

## GENERATOR SAFETY

ELECTRIC GENERATORS CAN BE VERY USEFUL DURING A POWER OUTAGE. MAKE SURE YOU'RE PREPARED ON THE OFF CHANCE ICE- AND SNOW-RELATED OUTAGES ARISE. VISIT [GREYSTONEPOWER.COM/SAFETY](http://GREYSTONEPOWER.COM/SAFETY) TO LEARN MORE ABOUT HOW TO SAFELY USE YOUR GENERATOR.

## YEAR IN REVIEW

With 2023 now behind us, GreyStone Power is happy to report on many accomplishments, such as some of the lowest-priced electricity in Georgia, capital credits returns and a successful right-of-way program to keep service reliable.

In October, GreyStone returned \$12 million in capital credits to members and former members. As a not-for-profit electric cooperative, we work diligently to keep costs low and return money back to members when possible.

In addition to returning money, GreyStone's prices are lower compared to other electric utilities. For those using 500 kilowatt-hours a month during the summer, GreyStone had the lowest summer rates out of all 41 electric membership corporations in Georgia. If you used 2,000 kilowatt-hours during a summer month, your bill was nearly \$90 less than a Georgia Power customer's bill, or 25% less.

GreyStone also looked for new ways to prevent outages. Trees are the primary cause of the co-op's power outages, so right-of-way work continued to be an important part of the reliability plan. Crews cut vegetation from around 600 miles of lines, and with technological advances such as satellite imagery, employees can more easily pinpoint problem areas.

GreyStone is always looking to improve customer satisfaction. One important initiative for 2023 was GreyStone Connect, our high-speed fiber internet access project set to launch this year. This will empower our unserved and underserved members as well as improve outage response times and ensure more efficient electricity delivery.

2023 was a year to remember, and you can always count on GreyStone's focus to be making life better.

*You're why* GreyStone Power safely delivers reliable, affordable electricity with some of the lowest rates in the state.

*You're why* we're finding new ways to resolve issues and prevent outages.

*You're why* the co-op has committed additional resources for adding line crews when needed and improving the outage texting service to keep you better informed.

**You're why GreyStone Power works to make life better.**

## Did you know?

GreyStone has a 99.98% reliability rating, and our operations and engineering division continues to work and plan to make sure you have power whenever you need it. One way we do this is by clearing our right-of-way of anything that could possibly cause an interruption in service to our members. In 2023, we cleared approximately 600 miles of our lines and cut around 1,400 hazardous trees.
