YEAR IN REVIEW

2021—What a year! We have all worked hard to settle into what has seemed like a new normal. Just as we promised last year, one thing never changed and never will: our unwavering mission to make life better for our members.

GreyStone's new headquarters in Paulding County has been operational for more than a year now and has met its goal of serving members better, as we are located at the center of our service area.

Our crews completed the last few upgrades of our systemwide LED upgrades, and the project is now complete. The LED project was completed under budget and ahead of schedule.

Currently, 93% of GreyStone's service territory has been successfully upgraded to LED fixtures. The remaining 7% of the co-op's outdoor lights are primarily inactive lights, which will be upgraded as members make the choice to activate them.

GreyStone is the lowest-priced electric membership cooperative in the state, according to the Public Service Commission's latest residential rate survey at psc.ga.gov, comparing winter rates at 1,000 kilowatt-hours.

In 2021, members received more than \$18 million in Wallet Watch credits on their bills. GreyStone also gave \$8 million in capital credits to members and former members last year. The result was \$26 million in savings in 2021.

We hosted our first-ever drive-thru Annual Meeting of Members, where we updated members about the business of their co-op. We were still able to give out prizes, including the grand-prize truck retired from GreyStone's fleet.

GreyStone Power—serving you for 85 years!

Improving reliability every day. So, you can rest easy at night.

People depend on GreyStone Power to safely deliver reliable electricity 24/7.

That's why we're continuing to build a smarter, sturdier power grid. It uses innovative technology to minimize outages.

To help prevent outages, crews maintain 500 miles of vegetation near power lines each year, trimming trees and limbs.
