GREYSTONE MARKETPLACE

A new year often brings many new goals. One of those may be to become more energy efficient. GreyStone Power is here to help. Our GreyStone Marketplace is your one-stop-shop for efficiency needs.

Shopping for energy-saving products can be daunting. Here members will find a resource to help navigate these purchases.

The GreyStone Marketplace is an online store that facilitates the buying of such products while offering instant rebates for certain items. That means you can be more eco-friendly while keeping more money in your pocket.

In the Marketplace, you will find ENERGY STAR-rated smart thermostats, lightbulbs, smart home products, water-saving devices such as low-flow showerheads and more.

Think about it this way: These products have the ability to help you reduce your energy use. Reducing energy use will lower your power bill, which means more cash for you. Add that with the savings on products, and that can mean significant savings.

"The GreyStone Marketplace gives members the ability to actively affect their energy use by purchasing energy-efficient items at a reduced price," says Drew Hook, manager of energy services.

Products can be purchased directly from the Marketplace website and shipped directly to members' homes.

Certain items sold in the Marketplace to our residential members will be available for instant rebates. Some stipulations may apply. Visit greystonepowermarketplace.com to learn more.

WiFi Enabled

EV Charger Rebate

As a GreyStone member, you can receive a \$250 rebate on a Level 2 electric vehicle charger.

If you are still looking for a charger, visit greystonepowermarketplace.com to save instantly on a JuiceBox.

PODCAST

GreyStone has a podcast just for you! Each month a new episode discusses topics from your electric membership cooperative.

From conversations with our CEO to learning about line work during natural disasters, listen to it all at greystonepower.com/powerlinepodcast.

GreyStone is powering economic development and growth in our local communities. We are focused on doing our part in creating jobs by providing electricity to businesses both small and large.

Recently we have won multiple opportunities to provide power for large-scale projects, including Harmony at Douglasville, a retirement community. This is just another way we are making life better in the communities we serve.
