## Save with FilterEasy

Seems like we all want to simplify our lives, but the hassles just keep coming.

Well, GreyStone Power is offering a simple way for you to keep the air in your home cleaner, replace those pesky filters that need replacing when they get dirty and have them delivered—in just the right sizes and types—right

to your door! And you'll receive the first ones FREE, compliments of GreyStone, as well as a 20 percent discount on following deliveries, which will be on the schedule you determine!

Welcome FilterEasy, a program to help residential members replace air filters periodically, which will also help keep your heating and air equipment running at peak efficiency.

"Replacing your filters is the most important low-cost investment you can make to save energy dollars, protect the air quality and comfort level of your home and protect your heating and cooling equipment," says Rudy Echols, department manager of Residential Energy Services for GreyStone. "The U.S. Department of Energy states that you can reduce your heating and cooling costs by 5 to 15 percent annually by changing your furnace filter properly and on a timely basis."

Visit FilterEasy.com/greystone to learn more and to set up your first order.

"The filters you receive will be at a price equivalent or lower than big-box store prices," says Echols. "And remember, the first ones are free, and on following deliveries you will receive a 20 percent discount, paid by GreyStone."
