CAPITAL CREDITS

Everything seems to be costing more each time you go to the store or shop online. You do not see companies giving away money either, unless you are a member of GreyStone Power.

This year, your electric cooperative is giving back \$12 million to members and former members who had service in 2002, 2003 and 2021.

You may be asking yourself why and how GreyStone is able to do this. The why is simple: As a not-for-profit co-op, we are owned by our members. Our goal is not to make extra margins. So, when we do have additional funds, we give it back.

Now the how is a little more detailed. At GreyStone, we work hard to make our members' lives better. This is done by charging the lowest price possible to give our members safe and reliable power. This takes planning and effort. When financially feasible and prudent, your investment in GreyStone is returned to you over time in the form of capital credits checks.

Members will see these checks in their mailboxes toward the beginning of October.

Members do not just receive the benefit of strategic financial planning on the back end. They also see it on the front end with the low prices mentioned earlier.

GreyStone is 21% cheaper than Georgia Power for members using an average of 1,500 kilowatt-hours per month, according to the summer 2022 Residential Rate Survey from the Georgia Public Service Commission, which can be found at psc.ga.gov.
