

RESIDENTIAL RATE CHANGE EFFECTIVE NOV. 1

The rising cost of energy is catching up with us, and those purchasing electricity from GreyStone Power will see that reflected on electric service bills, beginning Nov. 1, 2008. This is GreyStone's first increase in base rates since Jan. 1, 1992, and although this increase is unavoidable, your electric rates will continue to be some of the lowest in the state and nation.

You can help manage your use of energy by visiting www.greystonepower.com. You may also request a free copy of our "Plug into energy savings" booklet which will give you helpful ways to conserve energy by calling 770-942-6576.
