

MEMBER ALERT!

Capacity. Technology. Affordability.

Is our country ready to handle the energy challenges in each of these areas?

Ask your elected officials today!

Our Energy, Our Future
A Dialogue With America

92147-GreyStone-0811

LET YOUR VOICE BE HEARD.

Our nation's demand for energy continues to rise while our current resources are depleted. Congress is working on legislation that will shape the future—and cost—of electricity in America. We need to work together to find responsible and affordable ways to meet these challenges. **Your voice is critical in this debate.** Ask your elected officials how they're answering these questions. Contact them at www.ourenergy.coop, or fill out this form and return it with your next power bill. We'll make sure they know of your concern.
