## SMART THERMOSTAT REBATE

GreyStone members who own their homes and install an ENERGY STAR smart thermostat, or install an ENERGY STAR-rated heating/ventilation/air-conditioning (HVAC) system with a smart thermostat, will now be eligible to receive a \$100 rebate. Qualifying thermostats can be found on [energystar.gov](http://energystar.gov).

Smart thermostat technology enables you to remotely control your home's temperature via a tablet, smartphone or desktop using the home's Wi-Fi connection. Additionally, some smart thermostats learn from your behaviors and begin to adjust settings to match your preferences and schedule. A smart thermostat may allow you to track outdoor weather conditions, energy trends in your home and monitor the effectiveness of your HVAC system.

Smart thermostats that earn the ENERGY STAR rating are third-party certified by the EPA to save energy based on field data collected from more than 1,000 homes over an entire year. ENERGY STAR thermostats deliver energy savings and environmental benefits as well as reliable performance and convenience, insight and control.

Rebates will be paid per HVAC system (maximum three systems per home). Member will provide paperwork verifying thermostat information during GreyStone inspection. In no case will rebate be more than cost of the thermostat (tax and installation charges not included in cost). Qualifying thermostats purchased for existing systems are eligible. For newly-installed ENERGY STAR-rated systems installed by licensed HVAC contractors, the smart thermostat must be compatible. Rebates will be paid for 2018 purchases/installations or until allotted funds are depleted. To learn more, visit [greystonepower.com/rebates](http://greystonepower.com/rebates).
