## NEW EV RATE

Could you imagine not having to go to the gas station again? Have you thought about upgrading your current vehicle to a new electric model? Would you be interested in a rate plan created specifically for your new electric vehicle (EV)?

The use of EVs is on the rise, and GreyStone Power is here to help make that switch even better. GreyStone is proud to announce our new Residential Electric Vehicle rate. Members can sign up to the new time-of-use rate, which will allow you to better control your energy costs. The EV rate works by charging a lower price per kilowatt-hour (kWh) during the times of each day in which GreyStone's costs are lowest.

By visiting [greystonepower.com/ev](http://greystonepower.com/ev), GreyStone's EV webpage, you can view the breakdown of our new rate. Members who sign up will be able to charge their vehicles during super off-peak, off-peak or on-peak times.

Members can receive super off-peak at \$0.04/kWh, off-peak at \$0.06/kWh and on-peak at \$0.203/kWh. Some eligibility requirements do apply. Time-of-use is also based on the time of year; please see our EV webpage for more details.

Wondering about the benefits of owning an EV? Check out our EV page for more information about EVs.

Also, we have a savings calculator, a commute savings calculator and a CO2 reduction calculator. You can browse models of both EVs and plug-in hybrid EVs. And when you are looking for a place to charge up, use our charger finder for the closest place.

If an EV is ideal for you, GreyStone is here to keep you fully charged and on the road.
