## Process for Interconnection

- ✓ **Homeowner** must **complete** and **sign** the online Residential Application found on our website at [www.greystonepower.com](http://www.greystonepower.com). A representative of GreyStone Power (Lisa Lonon) will advise the member/customer if the application meets all of GreyStone Power Corporation's specifications and practices. This is the stage it will also be determined if the meter needs to be reprogrammed or exchanged.
  
- ✓ Email a copy of the specifications of the inverter, if back-up battery is to be installed, please submit information about the type and size as well to the email address listed below. If the information received meets approval, the solar contractor will be contacted that installation may begin.
  
- ✓ Upon completion, **mail** the Distributed Generation Interconnection Agreement, which is to be signed by the homeowner, the final, signed, jurisdictional approval (electrical permit) for the member's/customer's generating facility from the local government entity, a one-line diagram of the solar system installed, and the specifications of the inverter and the panels.

Submit all documents to:

**GreyStone Power Corporation**  
**3400 Hiram Douglasville Hwy.**  
**Bldg. 300**  
**Hiram, Ga 30141**  
**ATTN: *Lisa Lonon***

Email specifications for inverter to:  
[lisa.lonon@greystonepower.com](mailto:lisa.lonon@greystonepower.com)  
**770-370-2042 (O)**
